Prestressed Member Fabrication Plants (Multi-Project)

The Department reserves the right to conduct random sampling and testing, and visual inspections of materials from approved prestressed member multi-project fabricators. Department representatives may sample and inspect material at the fabrication plant or the project site. Material & Tests Division (MTD) reserves the right to test samples to verify compliance with Item 424.

For more information, contact MTD's Prefabricated Structural Materials Section at (512) 993-7117.

Reference

Refer to the Department's *Standard Specifications for Construction and Maintenance of Highways, Streets, and Bridges* for information on Item 424, "Precast Concrete Structural Members (Fabrication)."

Fabrication Plants

The following precast multi-project fabrication plants (as defined in Item 424) that produce major and minor prestressed members (as defined in Item 424) are approved in accordance with DMS-7300, "Precast Concrete Fabrication Plants".

The fabricator's monogram stamp is only to be placed on TxDOT-inspected product. This stamp should not be placed on product for which TxDOT has not provided Quality Assurance inspection.

Misuse of the approved fabricator's monogram stamp may result in plant disqualification in accordance with Article 7300.6.4 of DMS-7300.

Materials and Tests Division's Structural Materials Section verifies on a per project basis that products furnished to TxDOT projects from fabrication plants, approved per DMS-7300, comply with Buy America requirements.
